

SECRET BIRD WATCHER

Window-mounted birdhouse with 2-way mirror to secretly watch the life of birds

ASSEMBLY

STEP 1

Slide the clear back panel onto the back of the birdhouse. (Fig. 1)

STEP 2

Insert the perch into the hole in the front of the birdhouse. (Fig. 2)

STEP 3

Screw the suction cups into the pre-drilled holes in the back of the birdhouse and twist until secure. (Fig. 3)

STEP 4

Select a windowpane with a clean, smooth surface. Clean and dry the outside window glass before attaching the birdhouse. Moisten the inside surfaces of the suction cups by wiping them in a circular motion with warm water. Make sure the liquid is evenly distributed across the inside surface of the cups. Then press the center of each suction cup onto the glass. Mount the birdhouse at least five feet above ground so that it is not easily accessible to predators such as squirrels and cats.

Includes:

1. Bird house
2. Clear back panel
3. 2 Mylar 2-way mirror film
4. 3 Screw-backed suction cups
5. Perch

PLACEMENT

For best results, choose a window facing north or east to minimize exposure from the afternoon sun. Place your birdhouse in a quiet area away from noise and human activity. Do not be discouraged if birds do not immediately nest in your Secret Bird Watcher as it may take some time for them to find it.

BIRD PRIVACY

The Mylar 2-way mirror film allows you to see the birds inside the birdhouse without them seeing you. Make sure the inside of your window is clean prior to adhering the film. Spray the window with water or use a wet cloth to moisten the area just behind the birdhouse. Make sure the tab side of the film is on top and facing you for easy removal. Carefully peel off the backing of the film. Apply the film to the glass, then use a soft cloth or paper towel to smooth it down and absorb excess water. (Fig. 4)
